THE JUDGES

The Glass Magazine Awards are made possible by the industry judges who graciously lend their insights every year to this competition. This year's judges represent the multi-faceted nature of the industry, coming from all points along the supply chain, from manufacture and installation to design. In 2019, these experts reviewed 55 projects to determine winners in eight categories. The Glass Magazine editorial staff would like to thank the judges for sharing their time and expertise in this selection process.
